

WE ALL KNOW

OUR LIVES ARE

NOT IMPORTANT

BUT TREES

ARE !!!

PLASTIC!

Stop PLASTIC

- Plastic pollutes our oceans
- You kill innocent animals
- It takes centuries to disappear

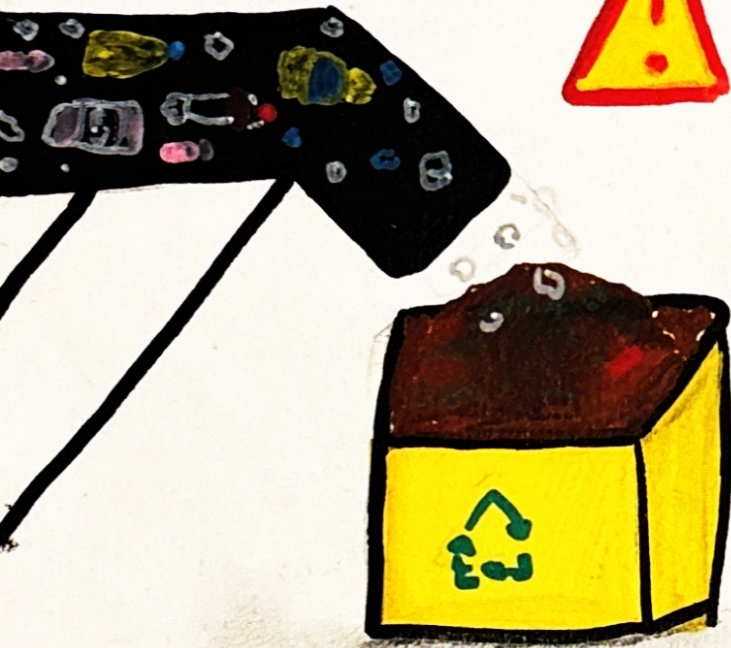

Act NOW!

- ✓ You Must sort your wastes!
- ✓ You must use reusable bags
- ✓ You must recycle

Did you know?

Only a small amount of plastic is recycled...

The rest ends up in nature."

WE CAN REPLACE PLASTIC BEFORE IT REPLACES US

We can live with less plastic. Let's choose better alternatives.

GLASS
Use glass instead of plastic bottles and jars.

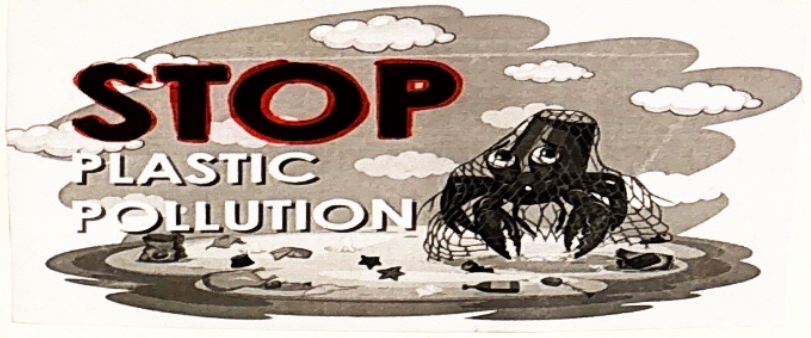

CARDBOARD
Use cardboard for packaging.

WOOD
Use wood instead of plastic utensils and straws.

COTTON
Use cotton bags instead of plastic bags.

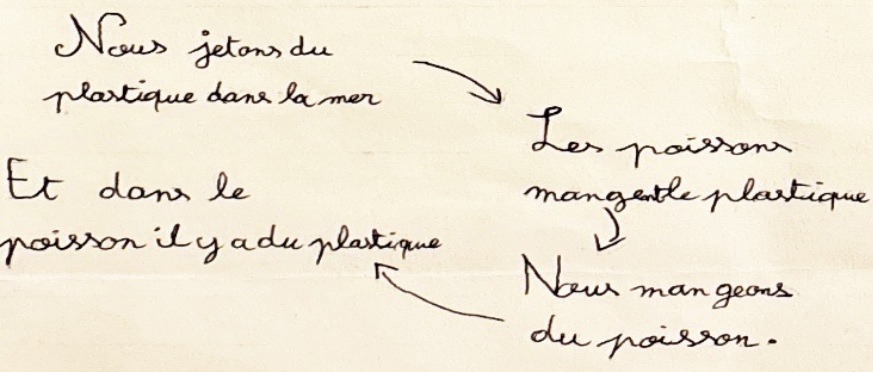

STAINLESS STEEL
Use stainless steel bottles and containers.

BAMBOO
Use bamboo instead of plastic straws and toothbrushes.

Commentaires: On peut remplacer des vêtements en plastique (polyester) par du coton car le plastique pollue.

On peut remplacer les bouteilles en plastique par du verre, car le plastique pollue la nature si nous le jetons dans la nature ou dans la mer.

Nous devons donc réduire le plastique et le recycler au lieu de le jeter dans la nature ou dans la mer.
